

Serie Mio-N excel by tability to combine nice smooth design with convenience. The combination toilet pan Mio-N brings an unusual, elegant design that is pleasing at first glance. The rimless design prevents deposition of dirt and bacteria in hard-to-reach spots, which makes WC cleaning much simpler. The combi toilet offers a deep flushing, and its advantage is the universal way of connecting the waste, the so-called Vario outlet, which permits horizontal, vertical or oblique connection. In addition, it saves water thanks to the Dual Flush system with the possibility of flushing with only 4,5/3 liters of water. The toilet can be ordered with a specially developed surface finish JIKA Perla (batch 100), which facilitates maintenance and extends lifetime. Attention: For the separate combination pan, you need to order a cistern with a fitting H829712 (incl. flushing mechanism with side water inlet), a seat with cover Mio. We provide an extended warranty of 10 years for JIKA ceramic products. Available 2Q 2024.

WC combi pan rimless, with lateral holes for water inlet, Vario outlet
